Interventional Urology

2022

Introduction

Innovation and commitment

Driven by a constant scientific innovation approach and quality values, trust and proximity, we are known for placing the patient at the heart of our commitment. Our leading solutions for Interventional Urology make it easier for you to practice medicine.

For more than 120 years, and by working together with surgeons, we have initiated scientific and therapeutic advances of the highest order. Our expertise and the high quality of our industrial processes contribute to offering you approved medical materials worldwide.

Our solutions to transform patient care

The range of products has been entirely designed to make patients' lives easier.

- Endourology: a wide range of disposable products for stone management like Dormia stone extractors, Ureteral stents, Access sheath (Retrace) and guidewires. We have extended our line with an innovative digital solution to remove ureteral stents in one step: Isiris α . The product is a single use flexible cystoscope with an integrated grasper.
- Women's Health: slings (Altis, Aris), and lightweight meshes (Restorelle), to treat stress urinary incontinence and pelvic organ prolapses.
- Men's Health: male sling (Virtue), inflatable penile implants (Titan Touch), as well as malleable implants (Genesis) to treat erectile dysfunction.
- Specialty Intervention: suction/irrigation device for laparoscopy (Elefant). Disposable devices related to the handling of prostatic disorders: prostatic catheters (X-Flow), bladder evacuator; and also addressing bladder and suprapubic drainage, urethral strictures, voiding dysfunctions, bladder outflow obstruction and other urological conditions (Cystodrain).

A trusted partner at your side

Because your patients have specific needs and your expectations are demanding, customer service and sales representatives are available whenever you need them, to help you find the right solutions to your specific requirements.

**Together, we can make life easier for patients
with intimate healthcare needs**

1 • ENDOUROLOGY

1.1. Stone extractors

Dormia No-Tip

Nitinol • 4 twisted wires.

- Individually packaged • Sterile • Detachable handle.

REF.	Ch/Fr	Length	Basket size
EXN434	3	90cm	14mm

Designed for semi-rigid and rigid ureteroscopy.

Nitinol • 4 round wires.

- Individually packaged • Sterile • Detachable handle.

REF.	Ch/Fr	Length	Basket size
EXN734	2.2	120cm	11mm
EXN934	1.5	120cm	9mm

Designed for flexible, semi-rigid and rigid ureteroscopy.
Supplied with a waterproof connector (Tuohy-Borst).

EXN734

EXN934

Dormia N.stone

Nitinol • 4 helical wires.

- Individually packaged • Sterile • Detachable handle.

REF.	Ch/Fr	Length	Basket size
EXT224	4	90cm	15mm
EXT424	3	90cm	15mm
EXT624	2.5	90cm	12.5mm

1 • ENDOUROLOGY

1.1. Stone extractors

Dormia Front

Nitinol • Frontal design.

- Individually packaged • Sterile

REF.	Ch/Fr	Length	Basket size
DOG158	1,5	120cm	8mm
DOG151	1,5	120cm	11mm
DOG208	2	120cm	8mm
DOG201	2	120cm	11mm

2 basket sizes opening, 8mm and 11mm to treat multiple stone sizes and volumes

Reinforced tip with shrink tubing made of polyester to assure durability.

Large opening to the front as in the grasper

Secure wrapping like a basket

ReTrace Ureteral access sheaths

- Radiopaque ring.
- Hydro-coated reinforced sheath.
- Compatible with a 0.038" stiff guidewire.
- Individually packaged • Sterile.

Single wire concept: the working guidewire turns into a safety wire.

Flexible tip concept: designed to respect the anatomy and prevent ureteral injuries.

- Connector: ergonomic shape.

K-Box

The new generation training model.

Unique 3D model for flexible ureteroscopy simulation and training.

It allows to learn:

- To manipulate the scope.
- To manipulate the scope with single use devices as baskets to catch and relocate stones.
- To perform step by step techniques.
- To use Holmium YAG in the different settings.

REF.

000PKBOX01

1.4. Double loop ureteral stents

Imajin Silicone double loop ureteral stents

The remarkable biocompatibility and flexibility of silicone makes it the material of choice for long-term implantation: improved patient comfort and less encrustation material compared to Polyurethane.

Duration of implantation: up to 12 months.

- **Kit composition:** each stent is supplied in a kit with a pusher (simple or steerable) and with or without a guidewire depending on the model.
Ø Guide: 0.035".
Steerable pusher: with or without radiopaque ring.
- **Box of 1** (with a guidewire) • Sterile.
- **Box of 5** (without a guidewire) • Sterile.

1.4. Double loop ureteral stents

Duration of implantation: up to 12 months.

Biosoft duo Multi-length hydro-coated double loop ureteral stents

Produced by coextrusion of a flexible material and a rigid material, Biosoft duo was designed for easy insertion, while retaining great flexibility for the patient comfort.

- **Kit composition:** each stent is supplied in a kit with a pusher (simple or steerable) and a guidewire. **Ø Guide:** 0.035".
- **Steerable pusher:** with radiopaque ring.
- **Box of 1** • Sterile.

- Box of 10 • Sterile.

Removable Luer-lock and universal urine bag adapter

REA000

Set with J catheter

Percutaneous set. Each component of the kit is supplied in the same peel pouch.

Set composition:

- Chiba needle 18G.
 - Seldinger guidewire 0.038".
 - 1 set of dilators depending on the catheter size.
 - Vortek J catheter with stylet. Length:29cm (except RJE114: 32.5 cm)
- Box of 5 • Sterile.

Cystodrain set

Suprapubic drainage sets with Silicone balloon catheter.

• **Sets content:**

Complete set

- Silicone balloon catheter
- Splittable trocar (12cm)
- Locking sleeve
- Spigot
- Clamp
- Scalpel
- Optional 2L Urine bag

Box of 5 - Sterile

Replacement set

- Silicone balloon catheter
- PTFE guidewire (90cm)
- Locking sleeve
- Spigot
- Clamp

Individually packaged - Sterile

Light set

- Silicone balloon catheter
- Splittable trocar (12cm)

Box of 5 - Sterile

PTFE Guidewire: Ch: 0.038" (0.97mm) and 0.032" (0.81mm).

TOUCH

1 • ERECTILE DYSFUNCTION

Titan Touch Inflatable penile implant

3-pieces inflatable penile implant with hydrophilic coating and deflate button pump design.

- Touch pump: one touch of the deflate pads allows for easy deflation of the device.
- The Bioflex® material of the cylinders allows for unmatched cylinder strength and rigidity.
- Reduced risk of auto-inflation with Lock-out™ valve on the reservoir.
- Titan HydroVANTAGE™ hydrophilic coating is on all device components, including rear tip extenders and connectors. Physicians have the ability to choose the aqueous solution dip, tailored to the clinical needs of their patients.
- Zero Degree angle proximal base input tubing for ease of surgical placement.
- Soft molded tip designed for suitable anatomic positioning.
- Individually packaged (pairs) • Sterile.

Altis

Single Incision Sling System

A synthetic single incision sling indicated for the surgical treatment of female stress urinary incontinence (SUI) resulting from urethral hypermobility and/or intrinsic sphincter deficiency (ISD). It is made from a knitted, monofilament polypropylene.

Product	Order Number
7.75cm Single-incision Sling with Single-use Helical Introducers	519650

Aris

Transobturator Kit

A midurethral sling made from synthetic, knitted, low-elasticity monofilament polypropylene intended to be placed via the transobturator approach. It is indicated for the surgical treatment of all types of stress urinary incontinence (SUI) and for female urinary incontinence resulting from urethral hypermobility and/or intrinsic sphincter deficiency (ISD).

Product	Order Number
Kit: 60cm Sling with Single-use Introducers (a Flat Curved and Helical Introducers)	UR3105
Sling alone	UR3101

Supris

Retropubic Kit

A midurethral sling placed retropubically and made from synthetic, knitted, low-elasticity monofilament polypropylene. It is indicated for the surgical treatment of female stress urinary incontinence (SUI), resulting from urethral hypermobility and/or intrinsic sphincter deficiency (ISD).

Product	Order Number
60cm Sling with Single-use Retropubic Introducers (top-down or bottom-up)	51956

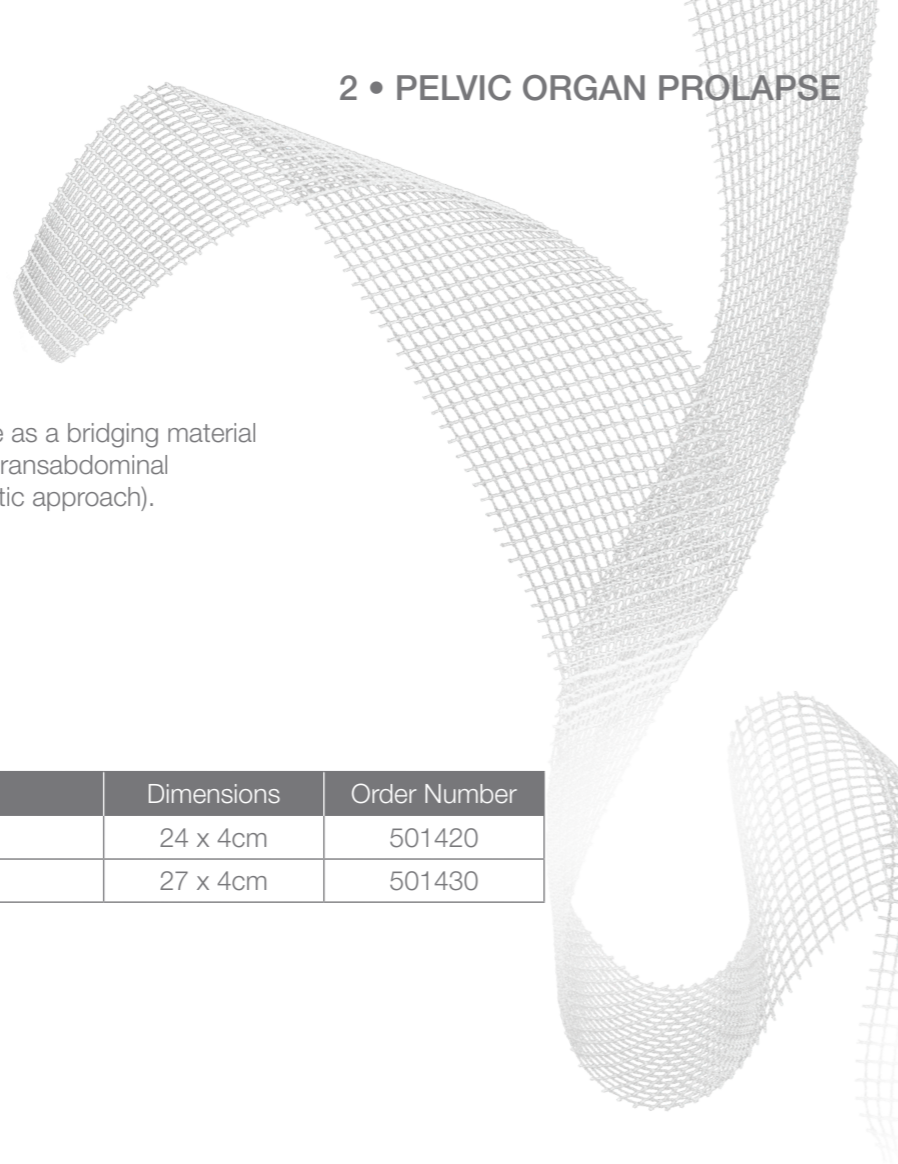

2 • PELVIC ORGAN PROLAPSE

Restorelle

Mesh

A shaped or flat synthetic mesh indicated for use as a bridging material for sacrocolposuspension/sacrocolpopexy (i.e., transabdominal placement via laparotomy, laparoscopic, or robotic approach).

Restorelle Y

Product	Dimensions	Order Number
Restorelle Y	24 x 4cm	501420
Restorelle Y	27 x 4cm	501430

Flat Mesh

Guarantee and conditions of use

Coloplast A/S - Guarantee and conditions of use

Without prejudice to your legal guarantee against all the consequences of defects or hidden defects, our commercial guarantee shall apply under the following conditions:

The duration of the normal guarantee of the products against defects in manufacturing workmanship and against defects in materials shall be a maximum of three months from the date of delivery (the "Warranty Period"), with the onus being on the Purchaser to prove the said defects.

Coloplast's guarantee shall be strictly limited to the products supplied and shall have as its sole effect the repair or replacement at the Company's expense and in its workshops of all those products rendered unusable as a result of defects. This is subject to Coloplast receiving written notice of the defect within 10 days from the date the defect was or should have been discovered by the Purchaser, within the Warranty Period. The return of the products must be done within the deadline communicated by Coloplast. Any return not respecting these conditions, cannot be the subject of an exchange. Products returned and replaced free of charge shall remain the property of the Company.

The guarantee shall not apply to replacements or repairs resulting from normal wear and tear of the products, to deterioration or accidents due to negligence, to any failure to respect the handling, transportation, storage or sterilization conditions, or to any failure to monitor, maintain or use the products correctly. EXCEPT AS STATED IN THIS GUARANTEE, THERE ARE NO OTHER EXPRESS, IMPLIED OR STATUTORY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

This guarantee shall not extend to any consequential or any other loss or indirect damage that may result from using a Coloplast product that has a manufacturing or material defect, whether for breach of any guarantee or warranty, for breach of any other term, or for ordinary negligence, unless it is shown from the circumstances of the defect that Coloplast has been guilty of gross negligence. The provisions of the United Nations Convention on the International Sale of Goods are expressly excluded from any purchase or sales contract of Coloplast products. Except as set forth in this paragraph, no compensation shall be payable by way of damages for any reason whatsoever. The storage conditions of the products shall be the sole responsibility of the Purchaser. We recommend that the products be stored in their original packaging with this packaging intact, away from light in a dry place, and at an ambient temperature.

The fact that a product is mentioned in this catalogue does not necessarily mean that it can be supplied. Committed to continually improving product quality, Coloplast reserves the right to make changes at any time, without notice, to its products, their specifications, packaging and presence in its range.

The purchase or use of our products implies acceptance of the general conditions of sale set out in the price list.

Instrument gauges • The catheter gauges are:
CHARRIERE: abbreviation «Ch/Fr» = 1/3mm
MILLIMETER: abbreviation «mm» = 1mm
GAUGE: abbreviation G. Gauge 14 = 1,63mm
INCH: abbreviation " = 25,4mm

Material used

Coloplast uses various types of raw materials, depending on the various diagnostic or therapeutic indications for its devices.

The biocompatibility of the medical devices is in accordance to EN ISO 10993-1: 2009 + AC 2010 standard.

Before being used in manufacturing, raw materials are controlled in our laboratories batch by batch, using the control methods defined by our internal procedure.

All materials and components used by Coloplast are controlled and used in accordance with procedures and the requirements of standard EN ISO 13485: 2012 + AC: 2016

The manufacturing processes depend on the material and include extrusion, injection or compression-molding, assembly and soaking.

We use three main types of material:

- Silicones
- Latex
- Thermoplastics: Vortek®, Biosoft®, Neoplex, Polyamide, PVC and Polyurethane.

SILICONE: this is a flexible material with optimum biocompatibility. Silicone comes in different degrees of rigidity; it may be transparent, may contain radiopaque lines and may be opaque to X-rays.

After use, it degrades only to silica (sand) and water, with no chlorine or carbon derivatives. It is very stable over time.

VORTEK: An original formulation designed by Coloplast. The material is biocompatible; it comes in different degrees of rigidity and is opaque to X-rays. Mastery of the co-extrusion of this material has made it possible to produce dual-hardness JJs which are rigid in contact with a guide wire to facilitate glide and assembly, while having a flexible exterior for patient comfort.

BIOSOFT: a flexible biocompatible polymer which is particularly well tolerated by patients.

NEOPLEX: a specific formulation developed by Coloplast based on PVC and plasticizer.

POLYAMIDE (PA): particularly rigid material suitable for accessories such as funnels, tips, sheaths, etc.

PROLYPROPYLENE (PP): is a synthetic material made of macromolecules. It is low density and exhibits excellent mechanical properties over time, with a high level of chemical inertness and biocompatibility.

POLYVINYLCHLORIDE (PVC): a transparent polymer which may contain radiopaque lines and/or pigments.

It has been used for many years for the manufacture of various medical devices.

POLYURETHANE (PU): a material which does not contain plasticizer and which is very resistant, and with different range of elasticity available.

LATEX: a natural latex compound stabilised by vulcanisers and by hardeners used to induce rigidity; it comes in various degrees of hardness.

It has been used for many years because of its low cost and natural elasticity. It may be coated with various substances which do not modify its intrinsic properties. It may also be reinforced with a spiral wire to resist crushing and folding.

Latex components

Coloplast hereby confirms that the products listed below contain latex

Coloplast develops products and services that make life easier for people with very personal and private medical conditions. Working closely with the people who use our products, we create solutions that are sensitive to their special needs. We call this intimate healthcare.

Our business includes Ostomy Care, Continence Care, Wound and Skin Care and Interventional Urology.

We operate globally and employ about 12 500 employees.

Ostomy Care / Continence Care / Wound & Skin Care / Interventional Urology
